

Release Notes for ROSETTA *Phoenix* Desktop R5.3.3 Build 1136

Date: June 19, 2017

System Requirements and Supported Configurations

- Microsoft Windows 7 (32-bit and 64-bit), Windows 8.x (64-bit), Windows 10 (64-bit) and Windows Server 2012 (64-bit, as a Citrix host)
- Microsoft Internet Explorer 9, 10 or 11
- Recommended RAM: 2GB or more

This Release Notes document lists new features, changes, bug fixes that are implemented in R5.3.3 and known issues since the release of R5.3.1.

ROSETTA Phoenix Desktop R5.3.3

New Features:

CR#	Description
23776	The Tracking Table window's columns are sortable when the column header is clicked.
23737	The PDF Links window's columns are sortable when the column header is clicked.
23691	The Search Results and Bookmarks Pane's columns are sortable when the column header is clicked.
23592	Phoenix Desktop will verify the status of link targets in the PDF Links window and display it in newly added "Status" column.
23591	The PDF Links window's targets are navigable when the hyperlink is double-clicked.

Bug Fixes:

CR#	Description
23832	A document name that included "doc" erroneously displayed a Word icon instead of the correct icon.
23772	When exporting a report to an Excel file that already exists and is open, the warning message generated did not correctly indicate the issue.
23754	An access violation occurred when a referenced file is accessed in the Cross Reference window after it is opened, closed and reopened.
23687	When documents were opened by the "Open in New Window" option, bookmarks failed to return the appropriate file path and open properly.
23679	The Locate in Windows Explorer functionality failed if the document path contained a comma or equals sign character.
23662	The Search functionality was slow when searching large submissions and using filter settings.
23653	An EOSError occurred if a search was done with "Include section headings" and Phoenix Desktop is closed.
23615	An access violation occurred when there were missing elements in the "admin" portion of the US 3.3 regional.xml file.
23596	When a backbone file was opened, the message "This is an orphaned file - no entry in Table of Contents." was erroneously displayed.
23513	The XML validation functionality reported an access denied error when accessing the US 3.3 DTD located at http://www.accessdata.fda.gov/static/eCTD/us-regional-v3-3.dtd

Known Issues:

CR#	Description
23830	For Thailand eCTD, the sections nodes under 1.3.1.3 do not display in the correct subsection number order.
23739	The PDF Links window will display the Hyperlink Index in an incorrect order.
Carried over from previous versions.	
23148	An access violation error occurs when following a specific bookmark to an external document in the same tab.
23143	An empty error message box appears when interacting with a document with annotations after editing and reopening it.
22414 22459	An access violation error occurs after a few times of Back or Forward operations when opened the target document in the same tab from within external bookmarks.
22091	There is no option for an end user to view the more recent document if the target document is replaced or deleted when following links in a document from within a new window.
18915	Some tool buttons of the embedded PDF Reader are not accessible if there is not enough viewing space for the Document View Panel.
18773	A PDF document's bookmark panel is collapsed in the embedded PDF Reader even if the PDF setting states to keep it expanded by default (A Foxit PDF Reader limitation).
18061	There is no vertical scroll bar for the Regulatory Activity View even if the view is crowded with many activities.
16763	The mouse wheel doesn't work on Search Results Pane within Phoenix Desktop.
